Defend Lytham

Petition for a moratorium on fracking in the local area

I wish to express my support for a moratorium on fracking until it can be proven that the end-to-end process is safe, and that its negative impacts can be avoided because:

- Fracking is an unproven and risky technology, which presents a clear threat to our town.
- Fracking will have an inevitable negative impact on the amenity value of the local area.
- Fracking will damage already fragile local industries like tourism and agriculture.
- Fracking could have a potentially devastating and permanent impact on our local environment.
- Fracking has been associated with significant adverse health impacts which are a cause for serious concern.
